Hi,
 No, no additional modeling or assumption changes are required. He just means peak speeds could be 200km/hr, not average speeds.

Thanks,
 Laura

Hey Laura,

Re: Steven's email, I just wanted to clarify his comment below:

"The top speed of the service would be 250km/h, from Kitchener to Windsor the alignment of the new dedicated corridor would not preclude increasing this in the future. Between Kitchener and Georgetown the top speed would be 250km/h, subject to further analysis (up to 200km/hr is attainable). From Georgetown to Toronto Union station speeds of up to 200km/h will be possible in line with the current plans for RER."

I want to ensure that I am understanding the highlighted portion accurately. Looking at SDG's runtime tables, the average speed in that segment is below 162 km/h between Georgetown and Pearson and below 100 km/h between Pearson and Union – in line with RER. Are we asking SDG to conduct any additional modelling or changes to their assumptions for infrastructure works?

No that's fine by me. We're just confirming understanding of the mail exchange between Steve and Jill last night right?

Hi Laura,

Just you or you and George would be ok – this is just a status update and you could update Steven after if that works. Would that be ok? Or would you prefer a chat in the afternoon anyway?

Thank you,
Abid

Hi Abid,

As per our chat, I'll be back at the office by 11:30. However, I didn't know you wanted all three of us. George and Steve are at a training session this morning. Not sure exactly when they'll be back this afternoon. Maybe check their calendars in Outlook? I think 13:00 might be a better time for all of us but please just check on Outlook.

Thanks,
Laura

Hi Laura,

Would you, George and Steven have some time this morning for a quick call with Krista, Jackie and I on SDG? We would like to discuss the current status and next steps for their work.

Thank you,
Abid
